Pathri, Maharashtra

- Percentage: 95.40%

Experience

Oracle Financial Services Software Limited

Associate Consultant

June 2024 – Present

Pune, Maharashtra

- Engineered high-performance RESTful APIs using Java, resolving issues and reducing API response time by 40%, efficiently handling 10,000+ concurrent requests while minimizing latency and enhancing data handling for high-volume banking transactions.
- Optimized SQL packages and stored procedures, improving backend performance for faster banking systems.
- Led JVM deployments on WebLogic, across test and production environments, ensuring reliable uptime and seamless testing.
- Developed banking screens with JavaScript, Core Java, HTML, CSS to enhance user interaction.
- Automated build, test, and deployment processes using Jenkins for CI/CD pipelines, significantly reducing manual errors.

Projects

Pizza Express App | MERN Stack

- Built a full-stack pizza ordering platform for a local business, enabling real-time order placement and admin-controlled menu updates.
- Features: Enforced user and admin account creation functionality. Additionally, integrated an exclusive feature to add new pizza, updating options in the menu.
- Implemented APIs to handle database connectivity, ensuring real-time updates and smooth communication between the app and the backend database.

Cab Management System | MERN Stack, Tailwind CSS

- Developed and collaborated on a team project, the Cab Management System, designed for cloud-based containerized applications.
- Features: Facilitated creating, updating, and deleting drivers, cabs, and assignments. Integrated a user-friendly features, allowing easy addition, editing, and removal of driver and cab details, along with seamless driver-cab assignment through a user interface.

Technical Skills

Languages: C++, C, Java, HTML, CSS, JavaScript, MongoDB
